Job Description

Role: Senior Dotnet Developer

➢ **Job Overview:**

We are seeking a talented and motivated .NET Developer with hands-on experience in ASP.NET, ADO.NET, C#, MVC, Angular, jQuery, Web API, and Azure. The ideal candidate will have strong proficiency in both front-end and back-end web technologies and will be responsible for designing, developing, and maintaining web applications that meet our business needs.

➢ **Responsibilities:**

- Develop and maintain scalable web applications using ASP.NET and C#.
- Design and implement Restful APIs using ASP.NET Web API.
- Utilize ADO.NET for effective data access and management.
- Collaborate with front-end developers to integrate Angular and JQuery for a seamless user experience.
- Write clean, maintainable, and efficient code, following best practices and design patterns.
- Participate in the full software development lifecycle, including requirements gathering, design, development, testing, and deployment.
- Deploy applications and services to Azure, ensuring scalability and performance.
- Troubleshoot, debug, and optimize existing applications to enhance performance and user experience.
- Stay updated with the latest industry trends and technologies, continuously improving skills and knowledge.

➢ **Requirements:**

- Bachelor's degree in Computer Science, IT or a related field.
- 5+ years of experience in .NET development with a strong focus on ADO.NET, MVC, SQL Server, ASP.NET and Web API.
- Proficient in C# and object oriented programming principles.
- Experience with front-end technologies (e.g., HTML, CSS, MS SQL Server) is a plus.
- Familiarity with version control systems (e.g., GIT, SVN).
- Strong problem-solving skills and the ability to work independently and in a team environment.
- Role: .NET Developer
- Industry Type: IT Services
- Department: Engineering - Software & QA
- Employment Type: Full Time, Permanent
- Role category: Software Development
